

## HOW IT WORKS

### BURGLARY

You simply turn on your alarm system each time you leave your home or office and switch it off again on your return. The alarm will be triggered when a person enter your home or office. It could also be programmed to protect you while you are at home.

### FIRE / MEDICAL / PANIC EMERGENCY

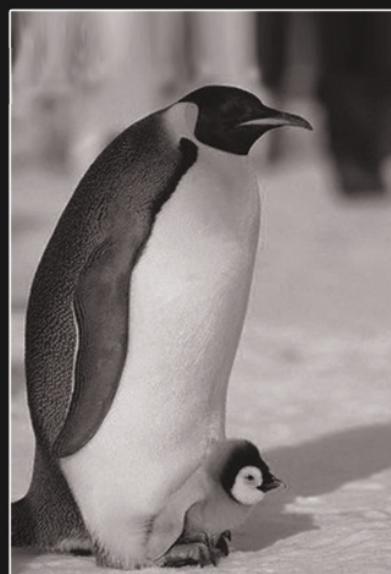

If you were to wake up in the middle of the night and see someone suspicious in your surrounding, or there is an emergency of any sort the panic button allows you to activate an alarm at the (Central Monitoring Station) CMS.

### HOSTAGE/DURESS

If a burglar forces you to turn the alarm system off, what can you do? You would probably want to turn the alarm system off and co-operate. Your Fearless monitored alarm system has an in built duress feature which can send a silent signal to the police, while you can still appear to have turned the system off.

## FEARLESS Advantage

- CMS – operational on 24/7/365 basis
- State – Of – The – Art systems & technology
- Highly motivated and trained response team employed by Fearless
- Affordable. Pay only for the monitoring fee
- High level of vigilance

## Why Monitoring Alarm System?

### Right People Come To Your Rescue In An Emergency.

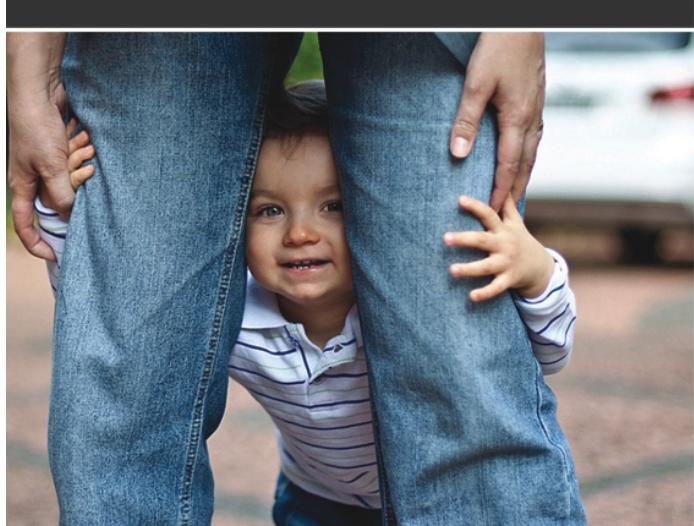

Some security systems just make a lot of noise and often ends up being ignored. In an emergency, you need someone to take notice and take action!

Get a fearless monitored alarm system which is connected to a 24-hour-a-day monitoring centre via your telephone line, ensuring an effective response.

## Beyond Fear

Real solace does not come from just installing a tracking device in your home. It comes from the surety that you are in the most reliable hands. Whatever your security needs may be, as a Fearless customer consider yourself and your loved ones beyond fear and rest assured that your home and business are in safe hands.

Be beyond fear 24/7 and leave your worries to Fearless, a proven guard against harm.

## What is the Product?

A reliable and effective solution which provides response to break-in and fire emergencies when you are away. The security system is linked to the Fearless central monitoring station which operates 24/7, ensuring that your property is monitored at all times. Remote monitoring can provide an effective and economical security solution which gives you peace of mind and reassurance that your loved ones and property are in safe hands.

- Highly economical and reliable
- Protects property and prevent loss
- Real time on 24/7/365 basis
- Operations are backed up by our own Fearless Response Team

### Basic Package

- Control Panel
- Key Pad
- Back Up Battery
- Siran
- Door Contacts 3
- Panic Button 1
- Motion Detector

## Burglary Protection

**LCD ICON Keypads:** Security at your fingertips – offering you simple large, easy identifiable one-button activation for various programmable function keys.

**LCD Keypads:** Conveniently at home – extra touchpad could be installed at your backdoor, study or bedroom, providing you quick access to panic buttons and system status.

**Door & Window Sensor:** Watching your doors and windows – using switches that are sensitive to applied magnetic field to identify opened entryways.

**Glass-Break Detector:** Keep intruders out – glass detector that could be mounted on walls or ceilings, recognizing the sound of breaking glass

**Motion Detector:** Pinpoint intruders and reduce false alarms using digital processing to accurately differentiating between legitimate intrusions and false alarms. Pet immunity solutions are also available.

## Fire and Life protection

**Smoke Detector:** Eliminate the threat of smoke and fire with attractive low-profile design which do not require running a wire to the detectors

**Medical Emergency Pendant:** Keeping alert when you or your loved ones are unwell – including the elderly and disabled. Saving time could be critical in such exigencies.

**Remote key:** Adds convenience and flexibility – with portable personal protection, enabling you to arm/disarm security systems from a distance.

## Added Services

**GSM Cellular Backup:** Providing alternative to phone line – added protection against accidental line cuts caused by storms, construction or deliberate tampering.

**Visual Verification Module:** Prevents false emergency service dispatches – by prioritizing and verifying alarms. You can also receive alarm event images to your e-mail account.
